DETAILED ACTION

1. This communication is in response to amendment filed 7/23/05.

Election/Restrictions

2. Applicant's election with traverse of restriction between group I and II (apparatus versus method) in the reply filed on 7/23/05 is acknowledged. The traversal is on the ground(s) that the system of claims 1-18 of invention I read on the corresponding method claims of invention II (claims 19-37). This argument is found persuasive. Accordingly, the confirms that the applicant may rejoin the system claims if the method claims are found allowable and that the system claims incorporate elements which correspond to the limitations of the method claims.
3. The examiner points out that the applicant while provisionally electing species II-A (as specified in the prior office action species II-A contains embodiments II-A through II-E reciting mutually exclusive features. As an example, Species II-B (claim 28) recites checking opening time, II-C (claim 31) recites correlation matrix, II-D (claim 33) recites calculating hedging factor and II-E (claim 34) recites calculating a price at which to offer to buy a previously placed bet. According Claims (28,31,33 and 34) of these species are withdrawn from further consideration pursuant to 37 CFR 1.142(b), as being drawn to a nonelected species II-B – II-E, there being no allowable generic or linking claim.

Claim Rejections - 35 USC § 112

4. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

5. Claims 19-37 and 50-98 are rejected under 35 U.S.C. §112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Taken as a whole the claims recite an undue multiplicity of claims by virtue of the unreasonable number of claims presented would tend to obfuscate, confuse, and becloud the claimed invention. Because the examiner believes that in his judgment that twenty (20) claims are sufficient to properly define applicants' invention, applicants are required to select certain claims, not to exceed twenty for examination on the merits of which no more than six are independent claims, See M.P.E.P. 2173.05(n). To be complete the non-selected claims must be cancelled or the applicant(s) must present appropriate arguments as to why the above rejection is in error. Note most patents (80%) have less than twenty claims while patents in excess of 100 claims are less than 0.35 percent cent of all cases filed and thus rare (See Federal Register: October 5, 1998 (Volume 63, Number 192, Page 53507). Note also the new excess claim fees effective 12/8/04 as evidence of what is considered to be unreasonable.

It is further noted that it would appear that a multiplicity of inventions also appear to be involved [originally presented and amended method claims 19-22 and 24-35 and newly presented method claims 66-98 are considered as mutually exclusive species, and newly presented claims 66-98 comprises claims which recite mutually exclusive species, example, species of financial markets (claims 67-69), species of set of parameters (claims 70-74, 76) etc.]. Accordingly, the applicants are requested to group their selection accordingly to read on a single invention. The applicant should group the claims according to what he believes to be

distinct inventions that may be restricted in a subsequent action.

Applicants are being afforded the courtesy of a written response due to the complexity of the case.
